**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

1. Claims 1-111 are rejected under USC 101 as the claimed invention is directed to non-statutory subject matter. For a claim to be statutory under 35 USC 101 the following two conditions must be met:

1) In the claim, the practical application of an algorithm or idea results in a useful, concrete, tangible result,

AND

2) The claim provides a limitation in the technological arts that enables a useful, concrete, tangible result.

As to the technology requirement, note MPEP Section IV 2(b). Also note *In re Waldbaum*, 173USPQ 430 (CCPA 1972) which teaches “useful arts” is synonymous with “technological arts”. In *Musgrave*, 167USPQ 280 (CCPA 1970), *In re Johnston*, 183USPQ 172 (CCPA 1974), and *In re Toma*, 197USPQ 852 (CCPA 1978), all teach a technological requirement.

The invention in the body of the claim must recite technology. If the invention in the body of the claim is not tied to technological art, environment, or machine, the claim is not statutory. *Ex parte Bowman* 61USPQ2d 1665, 1671 (BD. Pat. App. & Inter. 2001) (Unpublished).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3628

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-111 are rejected under 35 U.S.C. 103(a) as being unpatentable over Korhammer et al (US 6,278,982 B1) (hereinafter Kor) in view of Shoham (US 6,285,989 B1) (hereinafter Sho).

Kor discloses (see columns 1-14) all of the steps, methods, systems, and apparatus described in claims 1-111, including automatically performing at a trading process market discovery according to a discovery strategy selected from a plurality of discovery strategies by a user, automatically acting upon the order at the trading process according to an action strategy selected from a plurality of action strategies by the user, wherein the trading process is operative on a platform supporting a plurality of trading processes able to interact with the at least one market process, wherein the platform supports at least two market processes having respective market methodologies selected from a set of market methodologies, wherein the discovery strategy is defined by setting parameters independently of the parameters set for other trading processes that interact with the at least one market process wherein the automatically acting includes bidding or offering at the market process based on market discovery results, and wherein the trading process has satisfied a condition at the market process and further comprising automatically receiving a new contra-side best market price in advance of other market participants while the condition at the market process is satisfied. Kor does not use the terms discovery or action strategy

Sho discloses (see columns 1-16) a market trading system with an "infinite number of possible market protocols (**action strategies**) ... for execution", gathering and displaying market information (**price discovery**, etc.), and **automatically** adapts to the specific protocol executing.

Because it would have been advantageous and commonsense and would have provided a more comprehensive trading system it would have been obvious to one skilled in the art at the time of the invention to add the teachings of Sho to those of Kor, and to add those of Kor to those of Sho for the same reason.
